# 2018 ANNUAL DATA REPORT

## SOUTH CAROLINA STATE NFIRS PROGRAM

---

---

# INTRODUCTION

---

In 2018, South Carolina fire departments were called to 435,007 incidents, a 3.8 percent increase from the previous year. With mutual aid included, the number of reports increases to 470,101. More than \$160 million of property, 7,300 acres, and 97 civilian lives were lost to fires.

## A Day in the South Carolina Fire Service

Today, 1,188 calls for service will be resolved by the more than 19,000 firefighters in our state. Of these calls:

- 62 will be fires,
- 123 will be false alarms, and
- 709 will be medical or rescue calls (including MVCs).
- One in every 277 fires will be fatal.

With 435 fire departments reporting data to NFIRS, we can better understand our communities' need for fire department response.

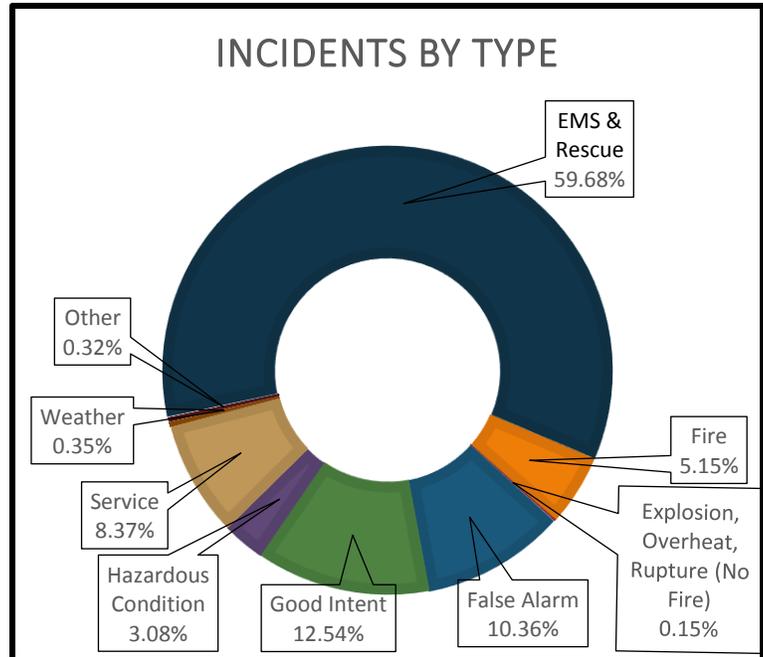

The South Carolina State NFIRS Program's mission is to serve local fire departments by providing training, analysis, account assistance, and reporting assistance in order to meet the goals set forth by the United States Fire Administration, South Carolina State Fire, and the local department. By having better quality data, fire departments can meet the safety needs of the community.

Reporting to NFIRS is required by South Carolina Code of Regulations 71-8300.5. Providing data to the State and USFA allows departments to apply for and receive grant funding, improve budget and resource allocations, recruit and retain fire service personnel, and create assessments to reduce risks in their communities. For questions about the State NFIRS Program, contact Samantha Quizon at (803) 896-1250.

Civilian fire death data is provided by the Community Loss Education and Response Team (see page 8). For information about the civilian fire death research program, contact Chief Josh Fulbright at (803) 896-9895.

# FIRE INCIDENTS

Approximately 5.2 percent of calls this year were fires of any type, including structure, vehicle, and outdoor fires. By learning about the location, frequency, and details of these fires, we can better prevent and respond.

When reporting fires in NFIRS, sometimes fire department personnel do not initially know how a fire started. For 41 percent of fires in South Carolina, it is “undetermined” what first ignited. Fire prevention through education, engineering, and enforcement can result from a better understanding of the more common types of fires occurring in South Carolina.

## Cause of Ignition for All Fires with Some Fire Spread

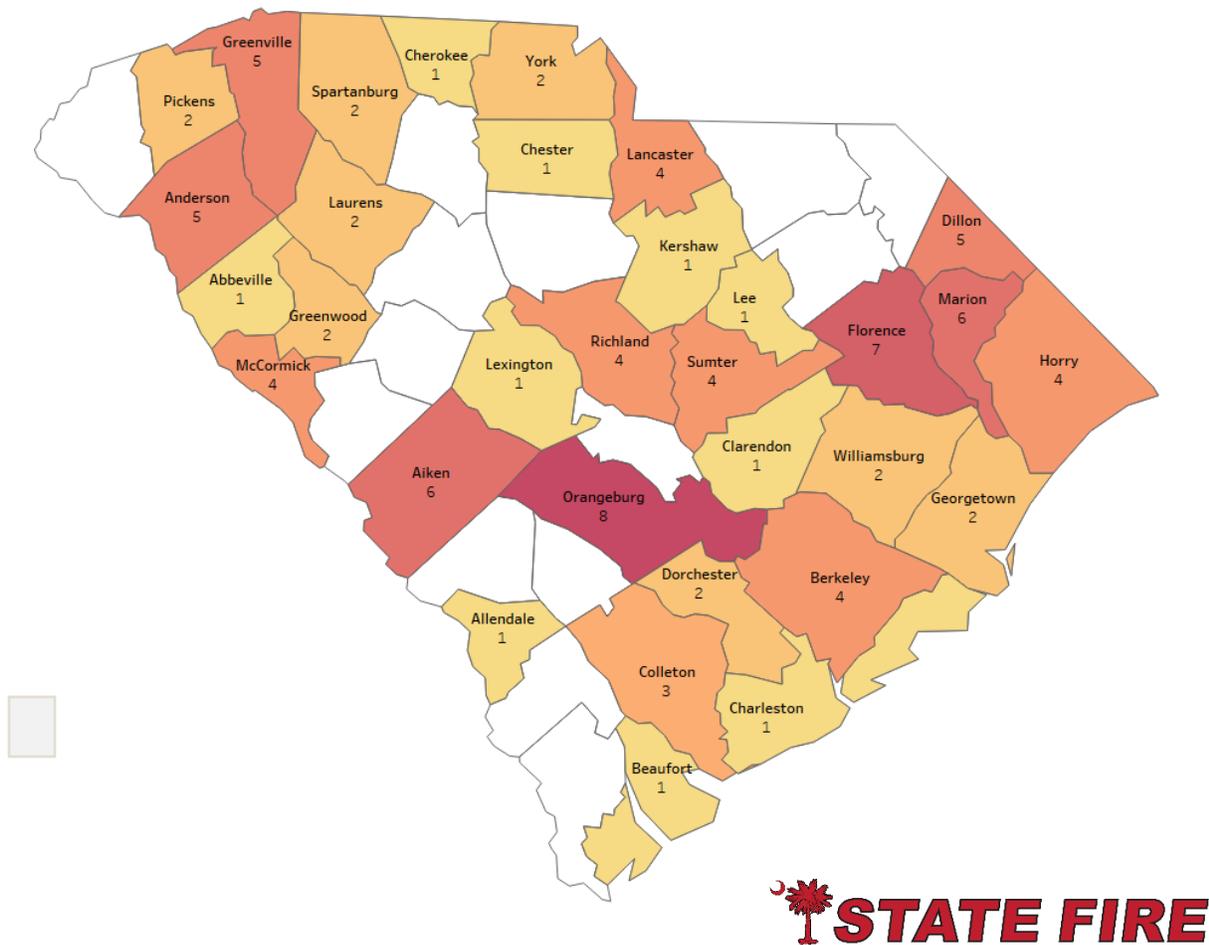

*Fires confined to the object of origin are not represented in this chart.*

# CIVILIAN INJURIES AND DEATHS

---

*Ninety-seven civilians lost their lives to fires, and 257 fire-related injuries were reported to NFIRS. The Community Loss Education and Response (CLEAR) Team responds to every fire death in South Carolina, and researches the incident and related losses. Using what is learned, we can better educate the public to keep themselves safe. Find a more in-depth report on the South Carolina State Fire website. Numbers below reflect what is known by State Fire, and may not be consistent with NFIRS data.*

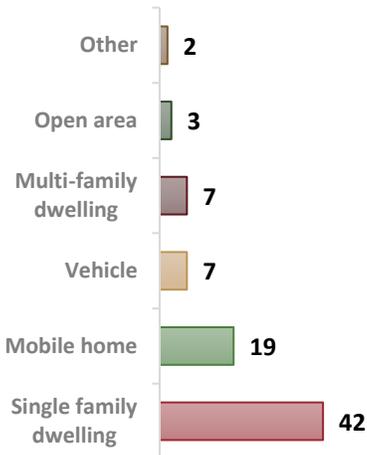

### Age of Victims

### Incident Location

## HOW DOES THE CLEAR TEAM HELP NFIRS DATA?

The Community Loss Education and Resource (CLEAR) Team is dedicated to researching the circumstances of fatal fires and the victims who perish within them.

The CLEAR Team works in tandem with fire departments to document fire fatalities in their entirety, including assisting in NFIRS documentation. In turn, State Fire uses reported fire deaths to compare those incidents to non-fatal ones.

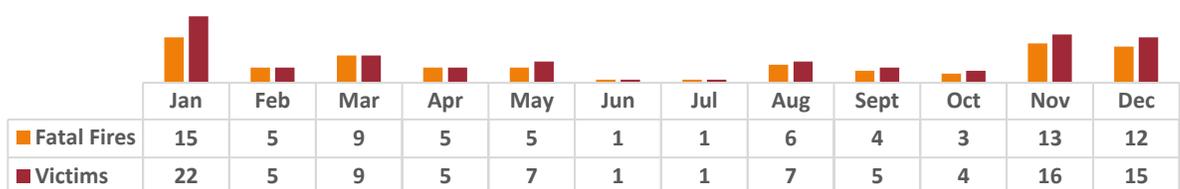

Every fire death must be reported to State Fire and recorded in NFIRS. By working together, we can understand why these losses happen in a multi-dimensional way.

You can learn more information about our state's fire fatalities through the South Carolina State Fire website. To report a fire fatality in your community, call the State Warning Point at 803-737-8500.

### Most Probable Cause of Fatal Incidents

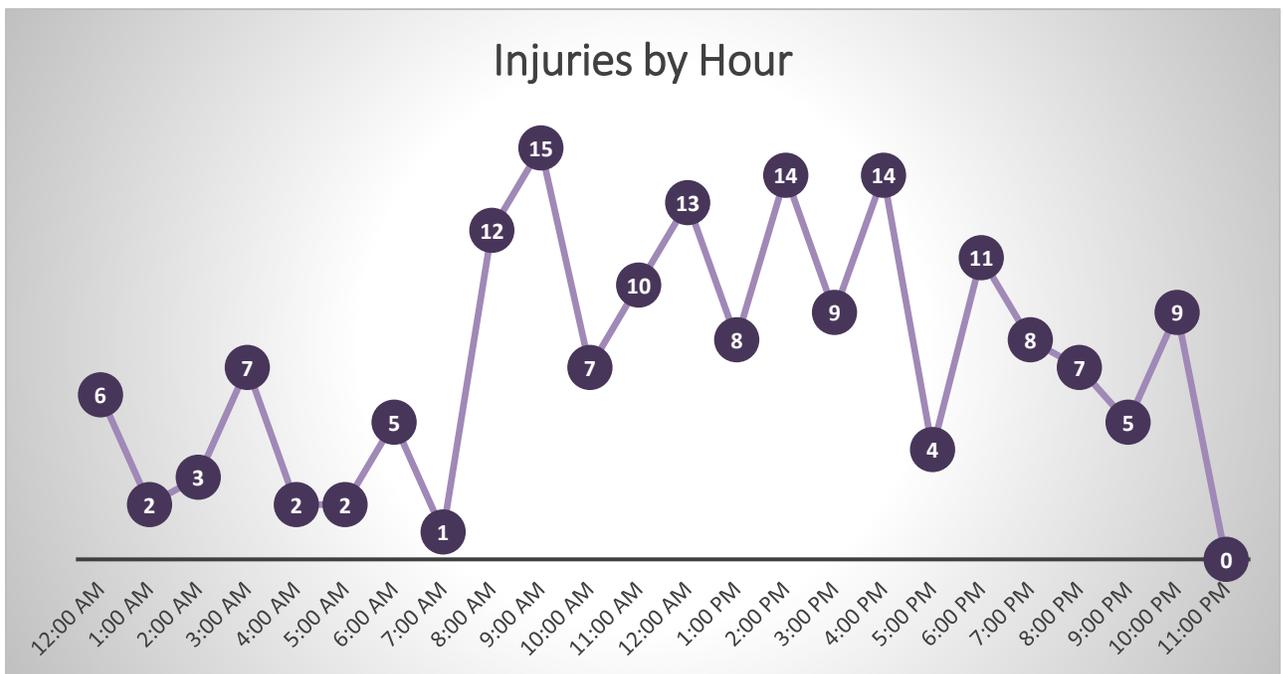

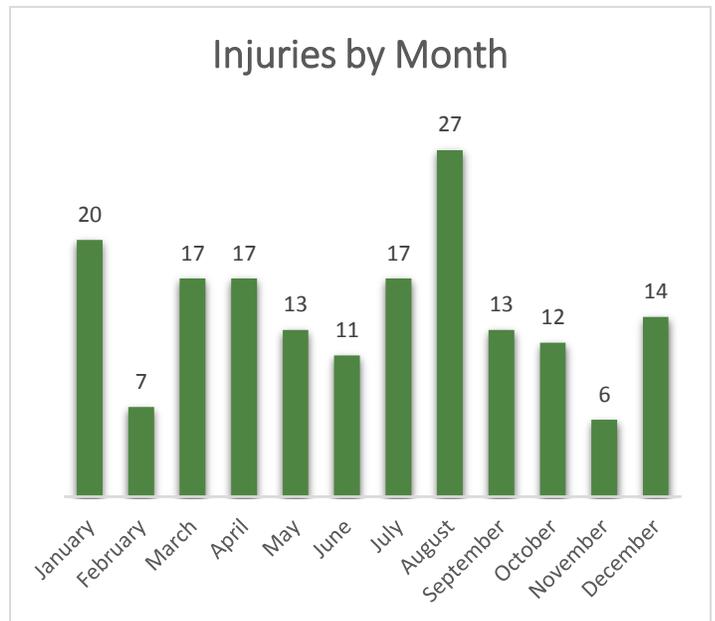

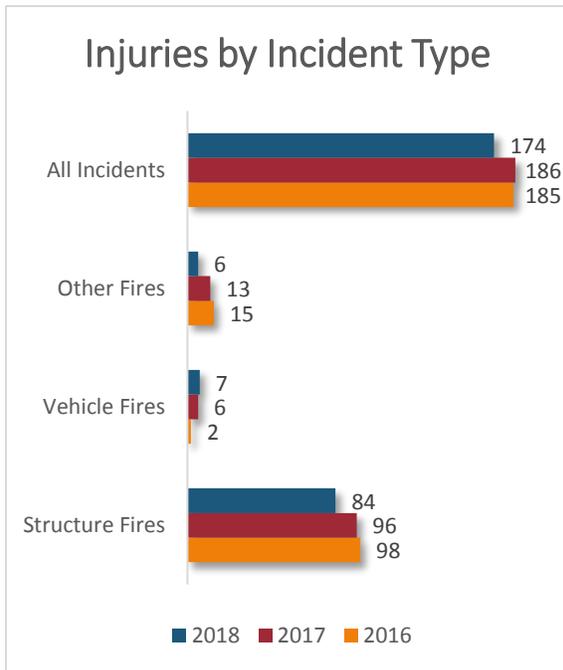

<b>Heating (24%)</b>	<b>Undetermined (13%)</b>	<b>MVC (8%)</b>	<b>Other (4%)</b>
<b>Smoking (15%)</b>		<b>Electrical (5%)</b>	<b>Arson (1%)</b>

### Frequency of Fire Fatalities

# FIRE SERVICE INJURIES

Firefighters encounter a number of hazards in the line of duty. This year, 174 fire service injuries were reported to NFIRS.
