

VIRTUAL LEADERSHIP TRAINING SERIES

The South Carolina Fire Academy presents a virtual workshop centered around fire service leadership training. This live, instructor-led workshop will be offered on a virtual platform. For your convenience, the event will also be recorded and posted for later viewing.

Developing the Next Generation of Fire Service Leaders

In the fire service, professional development is a critical element of being a leader. When we step up to accept the responsibility of leadership, we also accept an obligation to continue our training, education, learning, personal experience, and growth as we work to improve our effectiveness. This program will help students develop a professional development model for themselves and their organization, through identifying the components of training and education of each level in the fire service, understanding the importance of experience in the professional development model, and understanding the components of self-development.
