

In-Person Event

5241: Fire and Life Safety Educator Quarterly Training

The CO Problem: Awareness, Safety, and Solutions

Monday, Jan. 30, 2023

9 a.m. - 4 p.m.

SCFA Denny Auditorium, Columbia, SC

This course addresses the job performance requirements outlined in NFPA 1035 (Fire and Life Safety Educator). In addition to continuing education for fire and life safety educators, there will be updates on state programs and opportunities for professional networking.

This course is also appropriate for public educators who work with law enforcement and emergency medical services.

Carbon monoxide continues to be one of the top causes of unintentional death in America. The five leading states are Florida, South Carolina, North Carolina, Georgia, and Alabama.

The training will provide an overarching view of resources for code officials, public educators, medical responders, and public and private sector responders.

Objective: Bring forth emphasis on CO and the awareness of its presence in residential and commercial environments. The material presented will address building and fire safety codes, policies, procedures, and legislation that affect SC communities and the technology, initiatives, and educational methods toward solutions.

Seats limited - Register via Fire Portal by scanning QR code.

Fire service members
register with Fire
Dept ID (FDID).
