

## Curriculum Update: Hazardous Materials Program

The South Carolina Fire Academy is in the process of updating its Hazardous Materials program to the Sixth Edition. Please note the following changes:

### Hazardous Materials: Awareness (Course Codes 1427 or 2727)

#### **As of May 15, 2023:**

Hazardous Materials: Awareness is no longer available as an online SC Fire Academy course.

Students who prefer online delivery are encouraged to enroll in FEMA's [AWR-358 dL Hazardous Materials Awareness](#).

To receive SCFA transcript credit for the FEMA course, students must email their FEMA certificate along with their unique six-digit SCFID number printed in the upper left corner.

Email the FEMA certificate to [SCFAOnsiteRegistrations@llr.sc.gov](mailto:SCFAOnsiteRegistrations@llr.sc.gov).

#### **As of July 1, 2023:**

The updated, in-person Hazardous Materials: Awareness course consists of eight hours of classroom instruction, including a SC Fire Academy end-of-course exam.

*NOTE: This is the first of two communications to customers about the transition. The second communication, which will contain additional details, will be released in the spring of 2023.*

**Questions?** Please contact your [regional coordinator](#).
