Special Pilot Offering Interactive Online: 2150 - Incident Safety Officer

The SC Fire Academy is offering a second pilot delivery of the Interactive Online Incident Safety Officer (2150) course using a 100% online, self-paced, “learn-as-you-go” format through Blackboard. This course will be among the first to combine this instructional model with the electronic end-of-course testing, allowing students to complete the course and testing completely online.

This online, self-paced format provides a greater flexibility to students by allowing them to complete course work around their schedule. Each of the modules contain videos, knowledge checks, and activities that are designed to match the in-person class, allowing students to build the same skills while learning in a flexible, online environment. A group of instructors will offer feedback and discussion to ensure student comprehension. Students who complete this course will receive the same instruction, learning objectives, and skill development that those attending an in-person class would receive.

This pilot represents a significant step in the SC Fire Academy’s transition toward expanded online delivery and electronic testing. We are seeking motivated students who are willing to engage fully in the course and provide constructive input as part of this pilot program.

This course will be limited to 40 students.

Dates: August 1-15, 2026

Fee: Free

Registration Deadline: Saturday, July 18, 2026 at Midnight

Direct Registration: 2150-27w02 [LINK HERE](#)

Requirements: Students must have a computer with internet access, a FEMA SID number, and a SC Fire Academy Blackboard account.
